

E-invoicing 2030 checklist

Seven practical steps for your invoice process

The Dutch government plans mandatory B2B e-invoicing from 1 July 2030. Use this checklist to prepare while the bill is being developed.

- ☐ 1 Check whether your accounting package can receive, process and export UBL.
- ☐ 2 Map every incoming and outgoing invoice flow and the file formats used today.
- ☐ 3 Ask suppliers when and through which channel they can send structured invoices.
- ☐ 4 Test converting PDF, DOCX, scans and photos to UBL without manual retyping.
- ☐ 5 Set up a dedicated inbox, cloud folder or API connection for recurring flows.
- ☐ 6 Define who reviews invoices, corrects errors and handles exceptions.
- ☐ 7 Follow the consultation, the bill and your software provider's roadmap.

Note: this is general information, not legal or tax advice. The plans have not yet been enacted.
